

EnergySaver DriAir System

Intelligent Solutions for Air Quality

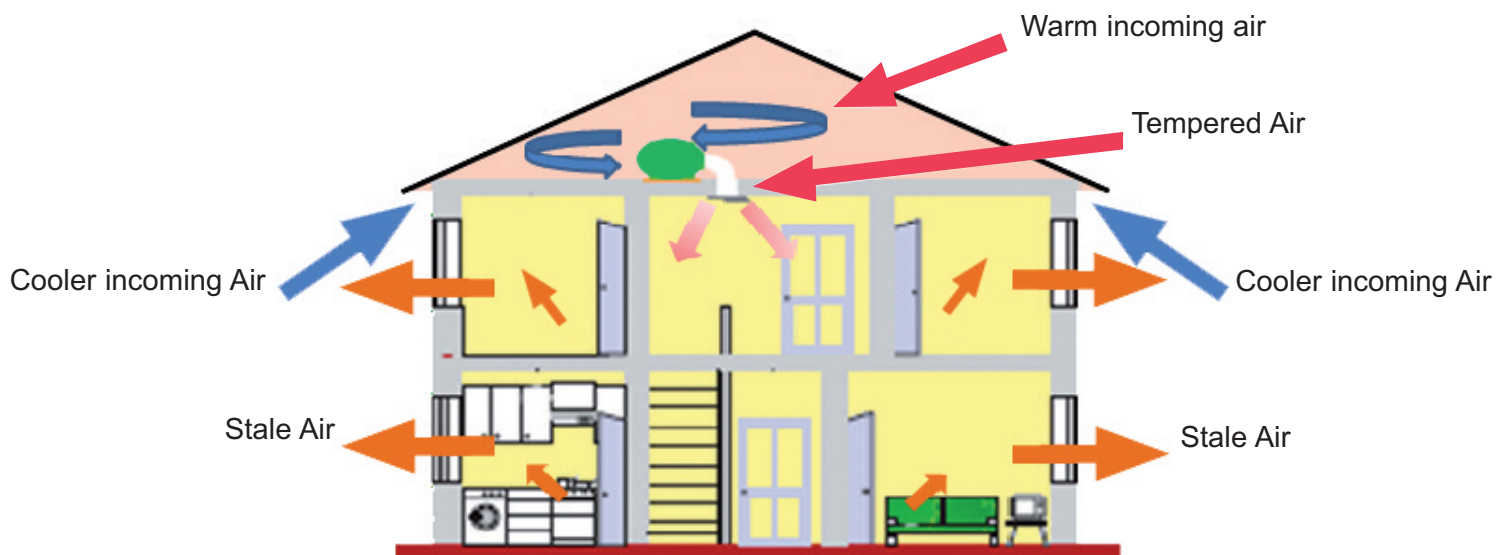

The **EnergySaver DriAir System** from **Envirowise** is designed to provide a reliable solution to condensation and air quality problems within the home. Two versions of the system are available - one for use in lofts in houses and the other designed for flats and apartments. The system works by introducing fresh, dry, filtered ambient air into the property. This 'clean' air is circulated around the property diluting and displacing the stale moist air and ultimately reducing the humidity levels to control condensation.

The system is also proved to be beneficial in repelling the natural seepage of Radon Gas in areas where Radon levels are a danger.

Designed with the client in mind the **EnergySaver DriAir System** has the following features:

- 5 year guarantee
- Helps lower energy costs
- Impedance protected 12 volt 4.5 watt DC ball bearing motor
- Controls condensation within the property
- Reduces the build up of Radon Gas where this is a problem
- Low maintenance

How the EnergySaver DriAir System works ?

EnergySaver DriAir System

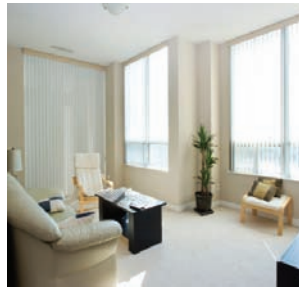

How the units work

The loft unit is fitted into the roof void and ducted via an air diffuser, normally mounted in the ceiling above a stairwell. Where there is a pre heat facility a control switch is conveniently sited to allow the user to control the heat facility and the fan speed.

The flat unit is fitted on a convenient wall, as close to the intake point as possible. Ideally the unit should be fitted inside a half cupboard, where access to an external wall and ambient air is possible. Supply ducting is then run to an outlet air grille, normally situated in the hall, in order that the introduced air is delivered to a central point within the dwelling.

EnergySaver DriAir System Special Features

- Energy efficient - consumes as low as 4.5 watts
- DC motor for quiet operation
- Diffusers designed to minimise draughts
- Versions available for flats, apartments and houses
- Optional pre heat facility on house versions (standard on the flat and apartment models)
- Four air volume speed settings

Why use Envirowise ?

- Envirowise are a division of Timberwise - market leaders in property care
- Professional competence
- Approved by leading Architects / Surveyors
- Fast friendly local service nationwide
- Fully insured for Public Liability and Professional Indemnity
- Speedy, efficient and competitive
- Health & Safety approved products
- Conscientious and tidy workmanship from trustworthy tradesmen

Over the decades Timberwise have treated in excess of 300,000 properties throughout the UK. With Timberwise you can be safe in the knowledge that your property is cared for by the professionals.
