

TIMBERWISE

The Driwise Solution

Get wise to **DRiWiSE** the driest solution for rising damp

DRiWiSE is a revolutionary new treatment of Rising Damp for the 21st Century. Unique to Timberwise, it has been specially formulated to combat the effects of Rising Damp with superior performance...

DRiWiSE comes in the form of a water-repellent cream, packaged in a foil cartridge to minimise environmental impact. It is introduced into the wall by means of a special applicator gun. Once Driwise is installed, it uses the moisture in the damp wall to diffuse to where it is most needed before curing to form a water-repellent resin. This is a considerably faster acting system, requiring no solvent or water to enable injection to proceed.

EFFECTIVE Tests demonstrate that Driwise offers a higher degree of protection against Rising Damp than the old fluid injection systems that is designed to replace.

CLEAN Driwise is not injected under pressure, making it a low hazard, cleaner and safer solution to use than conventional chemical injection systems. This means it is non caustic and non flammable with no spillage and virtually no smell.

EFFICIENT With minimal preparation and application time, Driwise minimises any possible disruption to the occupants of any property, ensuring peace of mind and satisfied custom.

GUARANTEED GPI and BBA approved, Driwise has a 20 year guarantee as a dry solution to Rising Damp.

Why Use Timberwise?

- Professional competence
